

A close-up photograph of a smart monitoring kit installed in an aquarium. The kit consists of a black cylindrical sensor unit with a silver-colored top cap, which is secured with a black screw-on cap. A black cable runs from the sensor unit across the water surface. In the background, another similar sensor unit is visible. The aquarium is filled with water and contains various green plants, including a large green leafy plant on the left and a variegated green and yellow plant on the right. The text "Smart monitoring Kit" is overlaid in white, bold, sans-serif font across the center of the image.

Sensor *Information*

A sensor is a device that detects and responds to some type of input from the physical environment.

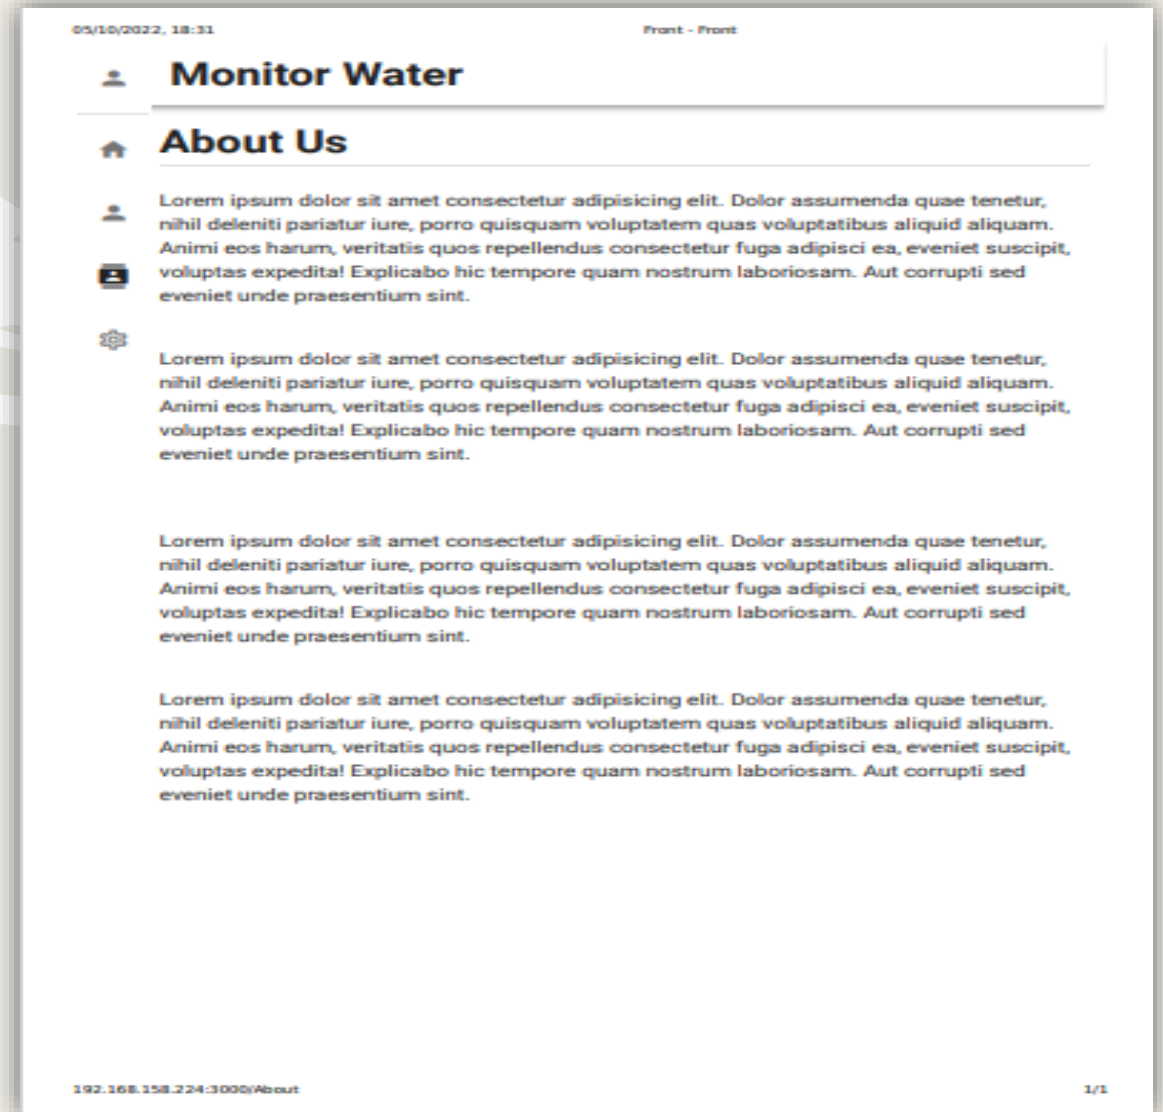

This is where the data collected by the sensor from the plants will be displayed.

About Us

This is where you will find general information about our organisation/ team members and why we have created this website. This will also show our Goal and Mission.

The primary purpose of this page is to inform the user about the website and its operations and will also incorporate contact information.

This page will serve as a marketing tool for our business, enticing potential customers with both the history and the aspirations of our business.

Sign In

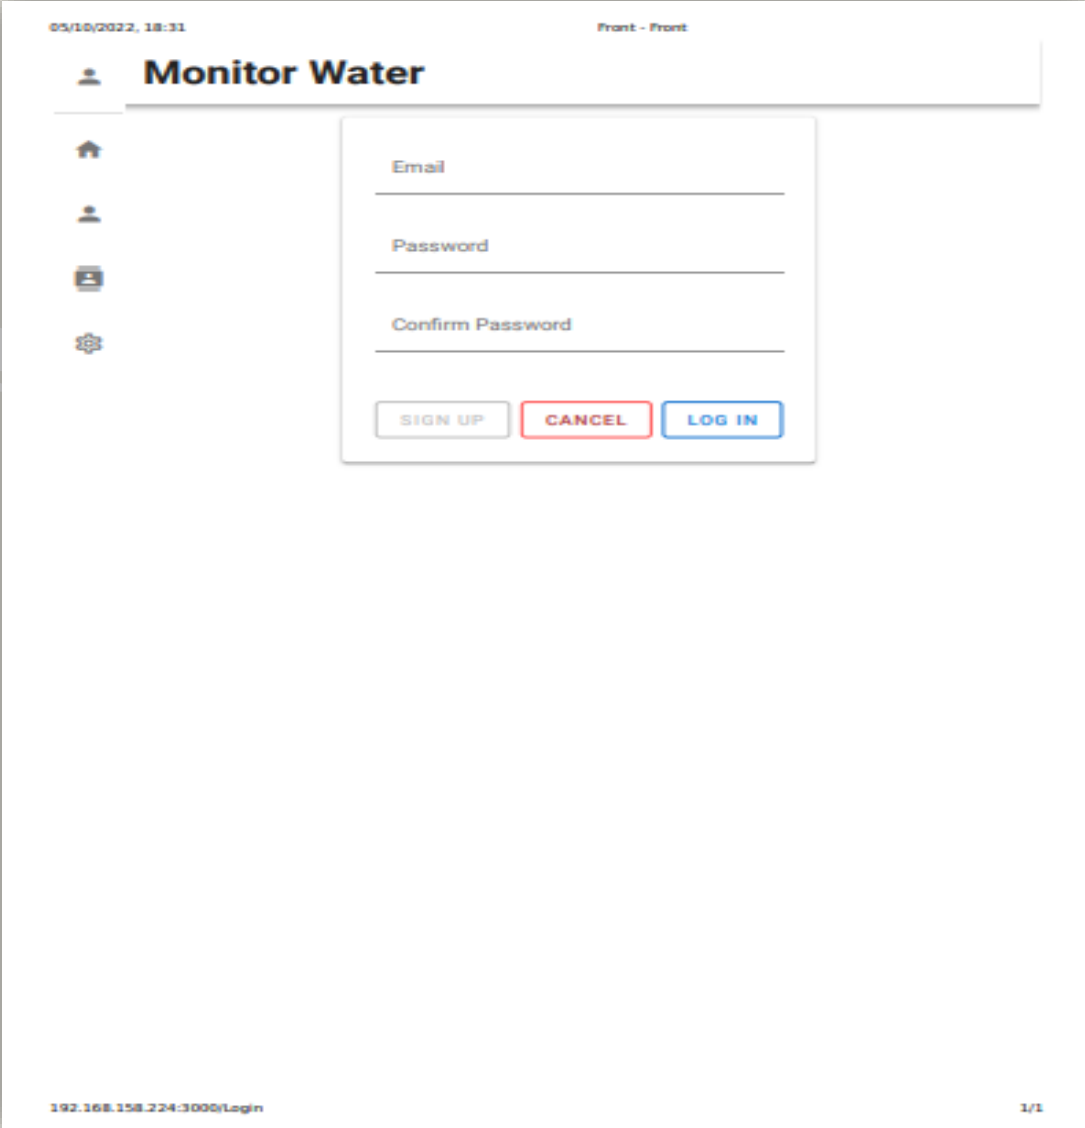

When you sign in, it means that's you as a user, is identified and authenticated to access the website because you have already registered.

By logging in what you simply do is authenticating yourself to gain access to the website. It is just an action which identifies you as a returning user rather than seeing you as a new user, in which case you will have to sign up.

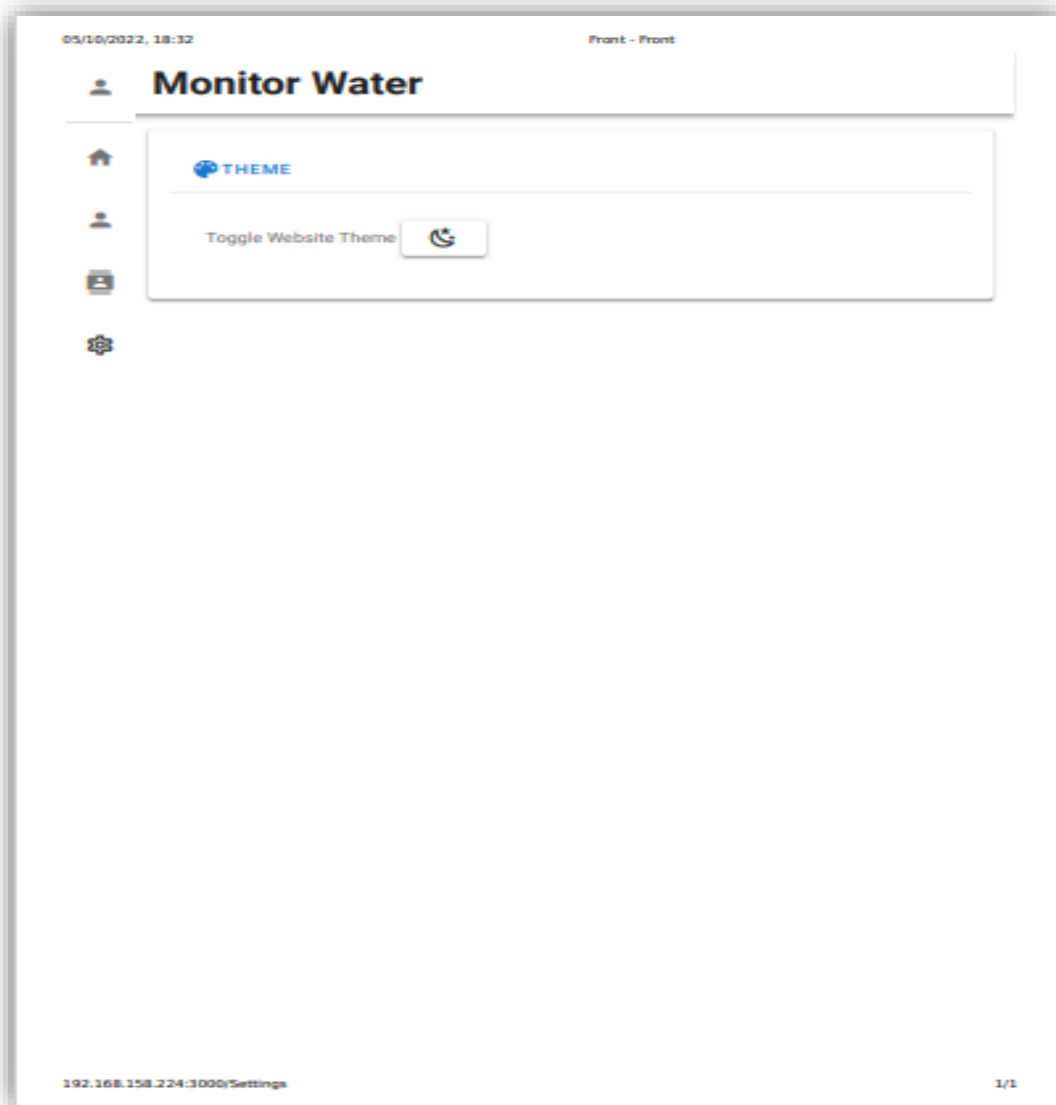

Sign Up

You need to sign up before you can access the website which requires you to fill your details which are email ID and a password to log in. If you are not a registered user already, you are always required to register.

When you sign up for something, you register yourself as a new user. This is where, as the new user you register/create a new account.

The screenshot displays the 'Monitor Water' web application interface. At the top, the date and time '05/10/2022, 18:31' are shown on the left, and 'Front - Front' is on the right. A navigation bar below the header contains a user icon and the title 'Monitor Water'. A sidebar on the left features icons for home, user, dashboard, and settings. The main content area is a sign-up form with three input fields labeled 'Email', 'Password', and 'Confirm Password'. Below these fields are three buttons: 'SIGN UP' (grey), 'CANCEL' (red), and 'LOG IN' (blue). At the bottom left, the IP address '192.168.158.224:3000/Login' is visible, and at the bottom right, the page number '1/1' is displayed.

Theme Setting

A theme is the foundation for the complete design of a website. On our website this setting allows the user to choose between light and dark mode.

Dark mode's aim is to reduce the glaring white light that may be distracting in the evenings. It may even be easier on your eyes than a traditional screen setting. This reduces eye strain at night and cuts glare.

The End!!
